

EXAMPLE DEPLOYMENT

Our project is a Application and website, uses it to free hosting and try out all its functions.

Prerequisites

Android, IOS, Chrome.

Get Started

GuideCar is English Application and website for maintenance car and teaching beginners step by step, Built using Adalo, HTML5, Firebase, MySQL.

RUNNING THE TESTS

We used black-box testing where we gave the application and website the input for the basic functions of the system and compared thses input with the expected results, and this archive.

Authors

Mayar khaled, Mais Abddullah, Fay Flimban, Mai Daif-allah

GUIDECAR

VERSIONING

This is the first version of our Application.
